

Introduction

Hubert Hell

Project Delivery Expert
CPM Hubert Hell GmbH
Theodor-Storm-Str. 44a
D-22926 Ahrensburg
Germany

[Website](#)

Hubert has more than 30 years of experience in project environments, most of it within the Banking and Financial Services environment. His solid project background, especially from a Business Analyst and Project Manager perspective, enables him to quickly understand the customer's needs and from that deliver tailored support. One key competency is his ability to "speak the language" of Business as well as IT, and explain topics in easy to understand terms to all parties involved. Depending on customer demand, his project roles vary between Business Analyst, Requirements Engineer, Application Manager or Project Manager.

Experience / Projects (extract only)

Business Analyst / Application Manager

at a Merchant start-up

Responsible for setup and run of all IT-components at this start-up. Included business requirements definition and review, management of external service providers, quality assurance, full testing responsibility, release management and first level support.

Support for Program Manager

at a card production company

Large project to update the debit and credit cards' chip operating system to enhanced cryptographic standards. Managed team of cryptography experts, set up time plan, communication plan and risk management.

Business Analyst, Project Manager

at an Issuer

Various projects at this issuer, mostly card related (credit and debit card). Scope included smaller regulatory projects (Visa and Mastercard scheme updates), introduction of chips on all cards, process, features and system improvements.

Business Analyst

at a large international retail and investment bank

Supported two major European-wide projects to dramatically improve the internal payment flow for business customers.
